Sheth L.U.J College of Arts & Sir M.V. College of Science and Commerce
Department of Information Technology (B.Sc.I.T Semester V)
Full Stack development MERN Practical

Module - II

(Backend Development Using Node.js, Express, and MongoDB)

Roll No.: T013	Name: Saqlain Khan
Class: TYIT	Batch: 1
Date of Assignment: 09-09-2026	Date/Time of Submission: 09-09-2026

AIM :- Node.js and Express Fundamentals

A) Install Express and create a simple server.

STEP 1 :- Create a folder and open it in VS Code and then inside the terminal write npm init -y that will create the package.json and then type the following command in order to install the Express

```
PS C:\Users\mv1uc\Desktop\Expresspractical> npm install express

added 68 packages, and audited 69 packages in 5s

27 packages are looking for funding
  run `npm fund` for details

found 0 vulnerabilities
```

STEP 2 :- Create a server.js file and write this code inside it

CODE :-

```
const express = require("express");
const app = express();
const PORT = 3000;
app.listen(PORT, () => {
  console.log(`Server is running on http://localhost:${PORT}`);
});
```

OUTPUT :-

```
Problems Output Debug Console Terminal Ports
C:\Program Files\nodejs\node.exe .\server.js
Server is running on http://localhost:3000
```

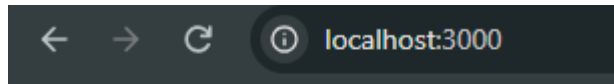

B) Display a message on the browser using the server response.

CODE :-

```
const express = require("express");
const app = express();
```

```
const PORT = 3000;
app.get("/", (req, res) => {
  res.send("Welcome to Express Server");
});
app.listen(PORT, () => {
  console.log(`Server is running on http://localhost:${PORT}`);
});
```

OUTPUT :-

Welcome to Express Server

C) Create different routes in Express.

CODE :-

```
const express = require("express");
const app = express();
const PORT = 3000;
// Home Route
app.get("/", (req, res) => {
  res.send(`
<h1>MVLU College Management Server</h1>
<p>Welcome to our college website.</p>
`);
});
// Students Route
app.get("/students", (req, res) => {
  res.send(`
<h1>Student List</h1>
<ul>
<li>Saqlain Khan</li>
<li>Ritesh Chaubey</li>
<li>Himani Malankar</li>
<li>Reze</li>
</ul>
`);
});
// Faculty Route
app.get("/faculty", (req, res) => {
  res.send(`
<h1>Faculty List</h1>
<ul>
<li>Sneha Gokarnkar - Information Technology</li>
<li>Rohini Bhosale - Information Technology</li>
`);
});
```

```

<li>Sumit Tripathi - Information Technology</li>
<li>Chetana Tanavade - Information Technology</li>
</ul>
`);
});
// Courses Route
app.get("/courses", (req, res) => {
res.send(`
<h1>Available Courses</h1>
<ul>
<li>B.Sc. Information Technology</li>
<li>B.Sc. Computer Science</li>
<li>B.Sc. Biotechnology</li>
<li>B.A. Multimedia and Mass Communication</li>
</ul>
`);
});
// Contact Route
app.get("/contact", (req, res) => {
res.send(`
<h1>Contact Us</h1>
<p>Email: info@mvlucollege.in</p>
<p>Phone: 9876543210</p>
<p>Address: Andheri, Mumbai</p>
`);
});
// Start Server
app.listen(PORT, () => {
console.log(` Server is running on http://localhost:${PORT} `);
});

```

OUTPUT :-

MVLU College Management Server

Welcome to our college website.

Student List

- Saqlain Khan
- Ritesh Chaubey
- Himani Malankar
- Reze

Available Courses

- B.Sc. Information Technology
- B.Sc. Computer Science
- B.Sc. Biotechnology
- B.A. Multimedia and Mass Communication

Faculty List

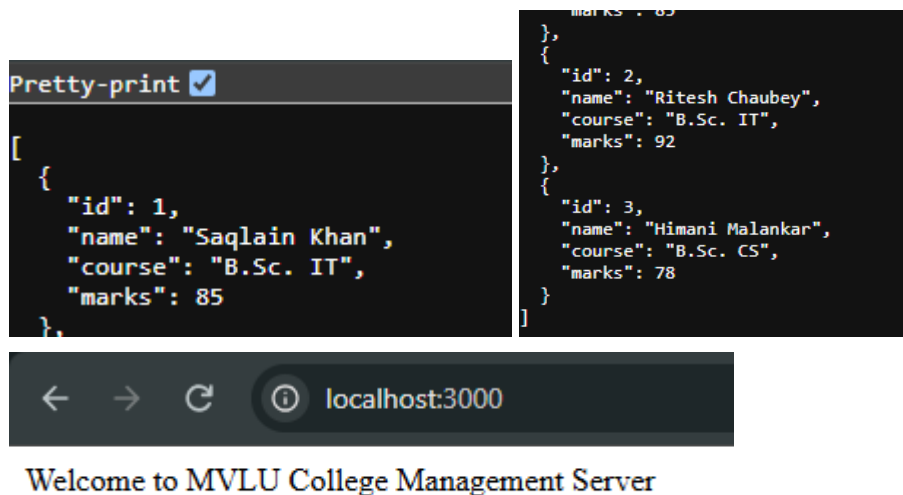

- Sneha Gokarnkar - Information Technology
- Rohini Bhosale - Information Technology
- Sumit Tripathi - Information Technology
- Chetana Tanavade - Information Technology

D) Send a JSON response from the server.

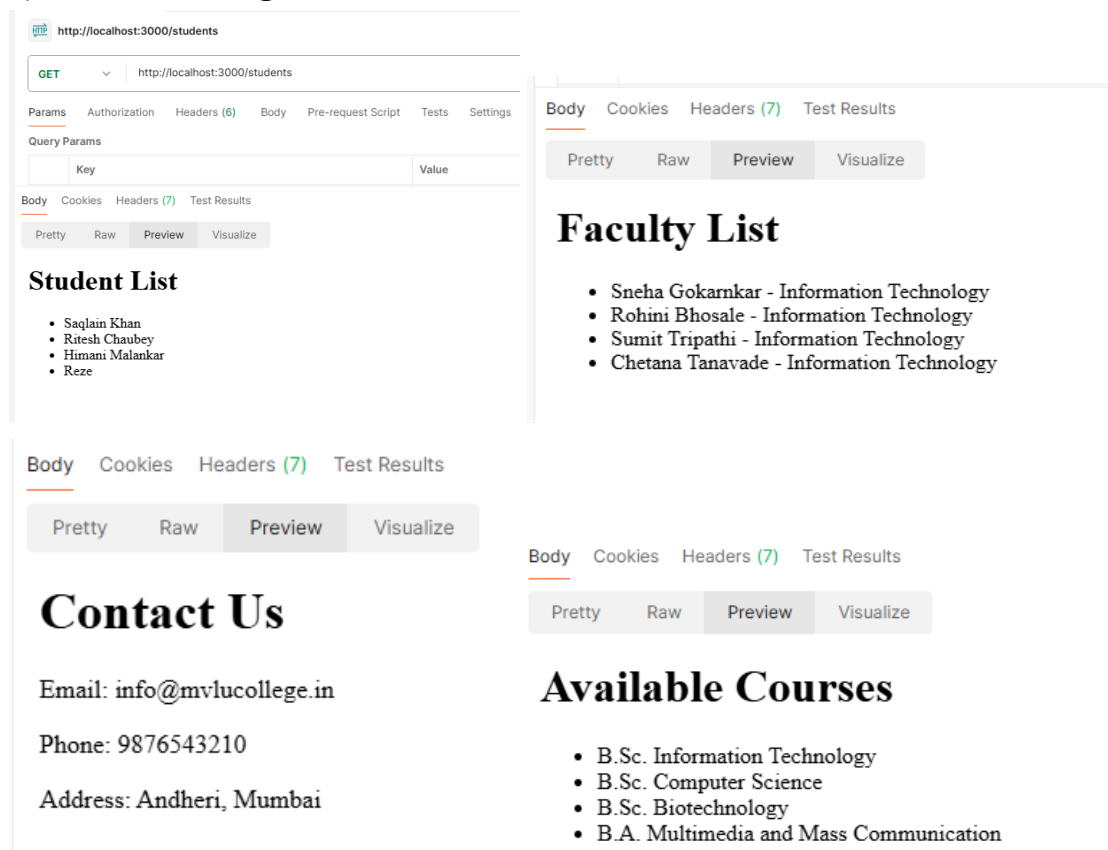

CODE :-

```
const express = require("express");
const app = express();
const PORT = 3000;
app.get("/", (req, res) => {
  res.send("Welcome to MVLU College Management Server");
});
app.get("/students", (req, res) => {
  const students = [
    {
      id: 1,
      name: "Saqlain Khan",
      course: "B.Sc. IT",
      marks: 85
    },
    {
      id: 2,
      name: "Ritesh Chaubey",
      course: "B.Sc. IT",
      marks: 92
    },
    {
      id: 3,
      name: "Himani Malankar",
      course: "B.Sc. CS",
      marks: 78
    }
  ];
  res.json(students);
});
app.listen(PORT, () => {
  console.log(`Server is running on http://localhost:${PORT}`);
});
```

OUTPUT :-

E) Test routes using browser or Postman.

F) Run the server and observe the output in the console.
