MERN STACK

Practical 1

Roll No.: T014	Name: Saqlain Khan
Class: TYIT	Batch: 1
Date of Assignment: 19-06-2026	Date/Time of Submission: 19-06-2026

A) Install Node.js and Visual Studio Code, and verify installation.

STEP 1 :- After installing node run this command to check if its installed

```
PS C:\Users\mvluc\Desktop\MERN Practical> node -v
v24.17.0
PS C:\Users\mvluc\Desktop\MERN Practical> npm -v
11.13.0
```

B) Create a simple Node.js file and run it using the terminal.

STEP 1 :- Create a file in the folder and create a new file and saved it as JS File and enter the code to print

```
JS Prac1B.js
1 console.log("Hello I am Saqlain, Welcome to first practical of MERN")
2
```

STEP 2 :- Go to the Terminal and use this command to get the output

```
PS C:\Users\mvluc\Desktop\MERN Practical> node prac1b.js
Hello I am Saqlain, Welcome to first practical of MERN
PS C:\Users\mvluc\Desktop\MERN Practical>
```

C) Write a Node.js script demonstrating basic JavaScript commands (console log, variables, and arithmetic operations).

Code :-

```
console.log("Basic Commands By Saqlain Khan")

let num1 = 20;

let num2 = 30;
```

```
console.log("First Number : ",num1);  
console.log("Second Number ", num2);  
console.log("Addition : ", num1+num2);  
console.log("Subtracttion : ", num1-num2);  
console.log("Multiplication : ", num1*num2);  
console.log("Division : ", num1/num2);
```

Output :-

PROBLEMS	OUTPUT	DEBUG CONSOLE	TERMINAL	PORTS
<pre>C:\Program Files\nodejs\node.exe .\Prac1C.js Basic Commands By Saqlain Khan First Number : 20 Second Number 30 Addition : 50 Subtracttion : -10 Multiplication : 600 Division : 0.6666666666666666</pre>				

D) Create and run a simple program using variables and functions.

Code :-

```
console.log("Basic Commands By Saqlain Khan")  
  
function add(a,b) {  
    return a+b;  
}  
  
fun = add(66,1);  
  
console.log("Addition : ", (fun));
```

Output :-

```
C:\Program Files\nodejs\node.exe .\Prac1C.js  
Basic Commands By Saqlain Khan  
Addition : 67
```

E) Demonstrate use of operators and control statements in JavaScript

Code :-

```
let a = 66;

let b = 67;

console.log("\n Comparision Operator")

console.log("a > b : ", a > b);

console.log("a < b : ", a < b);

console.log("a == b : ", a == b);

console.log("a != b : ", a != b);

console.log("\n If-Else Statement");

if (a > b) {

    console.log("A is Greater than B");

}

else {

    console.log("B is Greater than A");

}

console.log("\n Switch Statement");

let day = 3;

switch(day) {

    case 1 :

        console.log("Monday");

        break;

    case 2 :

        console.log("Tuesday");

        break;

    case 3 :

        console.log("Wednesday");

        break;

    case 4 :
```

```

    console.log("Thursday");

    break;

    case 5 :

    console.log("Friday");

    break;

    case 6 :

    console.log("Saturday");

    break;

    case 7 :

    console.log("Sunday");

    break;

}

```

Output :-

```

Comparison Operator
a > b : false
a < b : true
a == b : false
a != b : true
-----
If-Else Statement
B is Greater than A

Switch Statement
Wednesday

```

F) Write programs using loops and template literals.

Code :-

```

let number = 67;

console.log(`Multiplication Table of ${number}`);

for (let i = 1; i <=10; i++)
{

    console.log(`${number} x ${i} = ${number * i}`);

}

```

```
}
```

Output :-

PROBLEMS	OUTPUT	DEBUG CONSOLE	TERMINAL	PORTS
		<pre>C:\Program Files\nodejs\node.exe .\Prac1F.js Multiplication Table of 67 67 x 1 = 67 67 x 2 = 134 67 x 3 = 201 67 x 4 = 268 67 x 5 = 335 67 x 6 = 402 67 x 7 = 469</pre>
